Software for Patient Scheduling

SOFTWARE FOR PATIENT SCHEDULING IN WEEK-HOSPITALS
AND CLINICS

DESCRIPTION

This software allows the week-hospital manager to automatically generate appointments for patients waiting to undergo a number of prescribed diagnostic tests and treatments in the institution. The appointments are scheduled in the near future, seeking early admissions and as short as possible stays.

APPLICATIONS

Patient scheduling in hospitals and clinics | General week-hospitals
Specialized clinics/departments

ADVANTAGES

- Avoids tedious and time consuming scheduling by hand
- Increased patient comfort and safety due to short hospitalizations
- Optimal use of the hospital infrastructure (beds, equipment, etc.)
- Automatic notification to patients via sms and email

DEVELOPMENT STATUS

Full version currently under testing in the week-hospital department of a large regional Hospital in Bahía Blanca, Argentina.
