

#3316

Weathering

ACCELERATED WEATHERING TESTS UNDER SPECIFIC UV LIGHT,
HUMIDITY AND HEAT CONDITIONS

DESCRIPTION

The QUV accelerated weathering chamber can simulate the outdoor conditions that cause irreversible damages on many materials along years of exposure.

AVAILABLE EQUIPMENT

- QUV Accelerated Weathering Tester Q-Lab. Model QUV/spray with solar eye irradiance control

ADVANTAGES

- The effect of the exposure to controlled cycles of UV light (UVA 313 nm and UVB 340 nm), moisture and temperature may be easily evaluated with this chamber under ISO and ASTM standards
- Different sizes and shapes of samples may be easily adapted for testing

APPLICATIONS

Plastic films and products | Coatings | Adhesives | Paints | Textiles |
Papers and many other materials |
