

#3602

Environmental Analytical Services

EVALUATION AND IMPLEMENTATION OF SPECIFIC ANALYTICAL
METHODS

DESCRIPTION

Evaluation and implementation of analytical methods for environmental protection and occupational safety following national and international standards. Development or implementation of ad hoc analytical methodologies.

Air quality monitoring studies aimed at specific pollutants.

AVAILABLE EQUIPMENT

- Atomic absorption spectrometer
- Infrared spectrophotometer
- UV-vis spectrophotometer
- GC chromatographers (MS, FID, TCD)
- HPLC (PDA, fluorescence, IR)

ADVANTAGES

- Varied analytical equipment
- Analytical techniques for specific pollutants
- Versatile methodologies

APPLICATIONS

Industrial air quality | Indoor air quality | Occupational safety.
