

#5210

Laboratory sieves and sieve shaker (ZonyTest)

DESCRIPTION

Vibration sieving system used for particle size classification of powders and dry particles.

MAIN FEATURES

- Mesh range: from 25 μm to 4760 μm (depending on configuration)
- Sieve diameter: 203 mm
- Test sieves with mesh according to ASTM and ABS body

MAIN APPLICATIONS

- Separation of materials into different size ranges
- Quality control of raw materials and intermediate products
- Particle size characterization of powders and dry particles
