

#5503

Furnace (up to 200° C) (Garmont)

DESCRIPTION

Forced-ventilation drying oven for laboratory materials. Ensures homogeneous temperature distribution via forced-air convection. Includes a safety thermostat to prevent overheating and two wire shelves.

MAIN FEATURES

- Maximum temperature: 200 °C
- Heating system: forced-air convection
- 4 programmable cycles
- 2 wire shelves
- Safety thermostat against overheating

MAIN APPLICATIONS

- Drying of laboratory samples and materials
- Sterilization of materials
- Thermal conditioning prior to testing

ASSOCIATED CAPABILITIES

2503 - 2504
