

#5114

Heated orbital shaker (BIOMINT, Model BM081)

DESCRIPTION

Laboratory orbital shaker with an integrated heating system, designed to provide uniform agitation of samples and solutions under controlled temperature conditions. It has a large platform to hold laboratory vessels and an adjustable speed system with soft start and stop.

MAIN FEATURES

- Platform: 40 × 40 cm
- Shaking: orbital motion, adjustable speed
- Heating: integrated heating system to keep samples at a controlled temperature

MAIN APPLICATIONS

- Culture and incubation of microorganisms
- Preparation and homogenization of solutions
- Microbiological and biochemical assays

ASSOCIATED TECHNOLOGY AND CAPABILITY

1103 - 2105
